INFORMATION

HOW TO MAIL ORDER FROM THE CATALOGUE

Each miniature has a unique six-digit number. The first four digits of this number are the same as the four-digit code for the Catalogue page on which the miniature appears. The last two digits are specific to that miniature.

Using these numbers when ordering direct from the Games Workshop and Citadel Mail Order service will enable us quickly to identify the models you want and help us to process your order efficiently.

Simply quote the relevant numbers and use the prefix "CATALOGUE" eg. CATALOGUE, 010403, 010407 & 010409.

ABOUT CITADEL MINIATURES

The models we make are intended for collectors, modellers and as playing pieces for serious gamers.

THEY ARE NOT TOYS

Our metal models contain LEAD which can be harmful if ingested, but there is no real danger if you are sensible. Please follow these simple instructions:

- Please do not put them in your mouth or lick them.
- Do not buy them for or give them to small children.

Our miniatures should certainly never be given to children under 12, nor to older children who you cannot trust not to suck them.

Certain of the models within the Catalogue are cast as multi-part kits. These are designed to be assembled in as simple a fashion as possible. However, they can prove to be quite difficult to assemble, especially by young or inexperienced modellers. We therefore recommend that only experienced modellers should attempt these models.

CLEANING AND PREPARATION

On any metal casting a certain amount of cleaning and preparation work will be necessary before painting. This is especially true on multi-piece castings which will require careful filing and trimming to enable a neat finish on the joints.

Sometimes small pieces of excess metal like a 'halo' will be apparent around the edge of a figure. This is called 'flash' and can easily be trimmed off with a modelling knife. Please be very careful when handling modelling knives, which are very sharp. Work on a firm surface, preferably wood, and always cut away from yourself.

You may also find small slivers of metal extending from the figure on areas such as elbows and feet. Again, these can be easily trimmed off with a modelling knife and smoothed over with a rat-tailed file.

Glue the figure onto the slottabase as soon as you have finished cleaning it as this allows easier handling of the figure for painting. For gluing together any metal parts we suggest

a 5 minute epoxy resin glue or similar adhesive.

Once your figure is glued together, a little filing may be necessary to get rid of the excess glue. You may also wish to fill areas around joints to hide a join completely. Many two-part fillers are available from hobby stores.

You should not have to mix great quantities of filler (if you don't mix enough, you can always mix some more!) and use it sparingly. Get rid of any excess with a damp cloth while the filler is still wet. Again, don't be in a rush, and wait for the filler to dry before any final cleaning up.

Your figure is now ready for undercoating. We suggest you use a spray primer such as car spray or alternatively you can use Citadel primer or white emulsion. **DO NOT APPLY TOO MUCH** and if you are using spray, either use it outside or in well a ventilated room with plenty of protection behind, above, below and to the sides of the figure.

For painting your figure we recommend Citadel colour paints, as they are specially formulated to compliment our own figure ranges. They are non-toxic water-based paints, so you can clean your brushes in water and mix the paint with Citadel inks.

After you have painted your figure you will need a coat of varnish to protect it from the wear and tear of gaming use and general mis-handling. Gloss varnish protects the figure better than matt varnish, but some people prefer the latter's duller and more realistic finish. Whatever type of varnish you decide to use, make sure that it is clear and not tinted or stained such as used for wood.

You will find regular articles in WHITE DWARF magazine detailing methods and means of converting and painting your figures. Written by our own artists and figure collectors, they are full of useful advice.

SLOTTABASES AND PLASTIC SHIELDS

The majority of our models are supplied with these plastic accessories. Slottabases are covered fully on the relevant page of the Catalogue. Plastic shields are supplied with those miniatures which are illustrated with them. Additional shields can be ordered separately (see price list).

CITADEL PLASTICS

PLASTIC BASES

We now produce a variety of different size and shape slottabases.
The simple key below indicates which bases are suitable for use with each range.

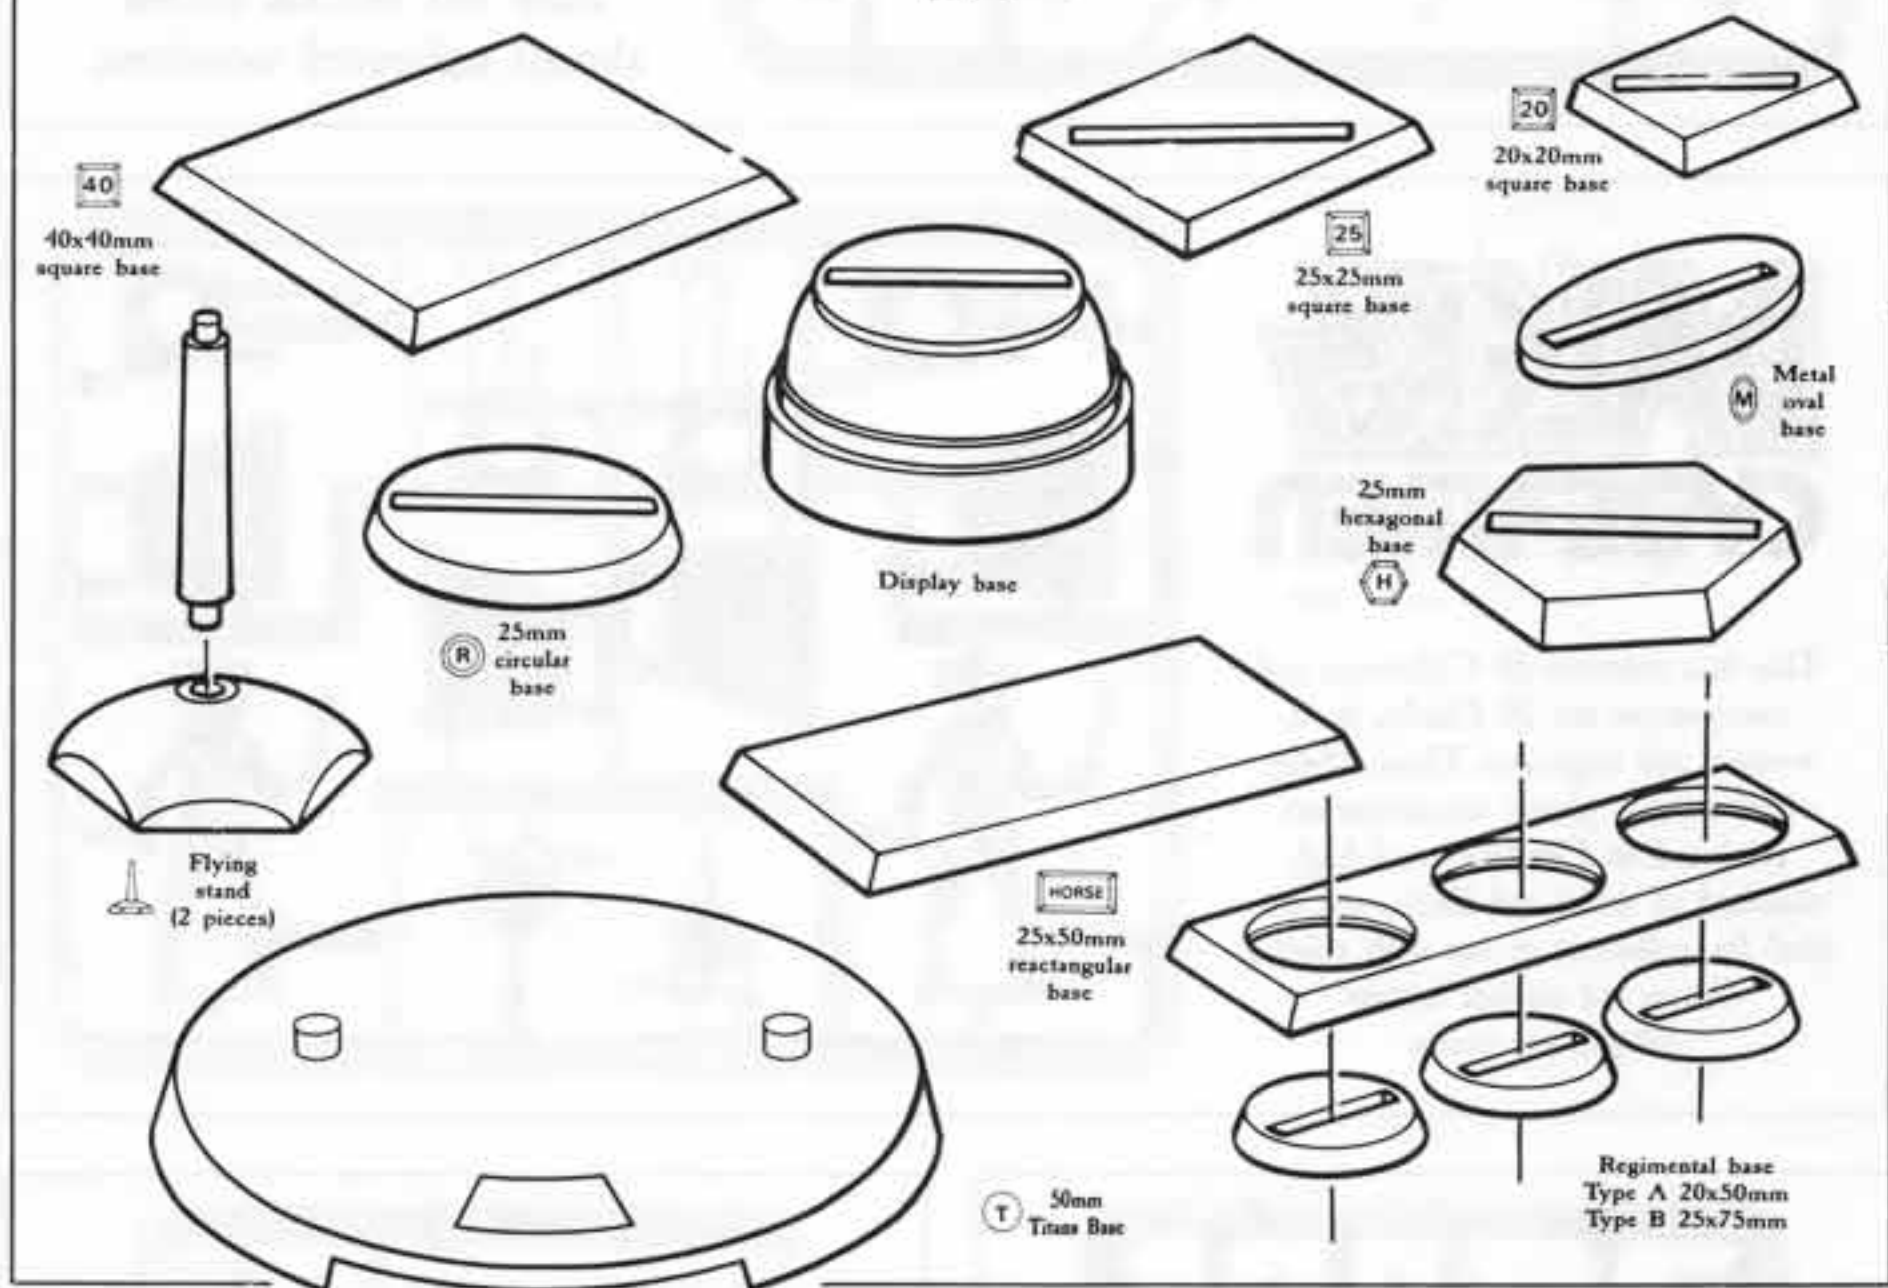

Each base has a pre-cut groove to accept the tab cast-on to each miniature. Some tabs may require a small amount of filing or trimming to fit the base. Do not force the model on as this may break the model or the base. Apply glue to the tab on the model and fix to the slottabase as shown.

Slottabases are generally included in the price of the models and are normally supplied with the same base type as illustrated in the photograph. The exceptions to this are the Display Plinth, Metal Oval base and Regimental bases (Type A and B) which must be ordered separately at an additional charge. However, the regimental bases may be supplied *instead* of regular bases at no additional cost on a 3 to 1 basis. For example 15 orcs with 5 regimental bases Type B cost the same as 15 Orcs supplied with 15 square bases.

Throughout this catalogue the base symbols illustrate exactly which bases are suitable for use with any particular range of models. Please note that models cannot be adequately supported on bases for which they are not designed. Indicate your choice of base when ordering. Unless otherwise instructed models will be supplied with the bases they have been photographed with.

Certain models in our range are designed either to not require a base at all or are cast with an integral metal base. These models are noted with this symbol 

Regimental base A is suitable for use with all codes marked with the  symbol, base B is suitable for use with all codes marked with the  symbol.

01

PLASTIC CROSSBOWS

Each crossbow is moulded in hard styrene plastic, which affixes easily to the hands of Citadel's new crossbowmen, or to the backs of any other figures, giving them awesome fire power.

02

PLASTIC SPEARS

Designed for use with Elf cavalry and infantry, and moulded in hard styrene plastic, each finely sculpted spear can easily be fixed in place to allow a more realistic 3 dimensional effect.

CITADEL PLASTICS

SKELETON HORDE

01

This box contains 6 sprues of superbly detailed hard styrene plastic components, with enough parts to assemble 24 Skeleton models. Supplied with shields and bases. The range of body positions, heads, arms and shields allows almost unlimited variations.

DALEKS CYBERMEN

02

This box contains 20 Cybermen and components for 20 Daleks, both warriors and engineers. These 25mm hard styrene plastic miniatures are produced to Citadel's usual high standard of detail and finish, and are ideal for collectors or use with science fiction and science fantasy roleplaying games.

PAIN T

CITADEL COLOUR

Citadel Colour Acrylic paints and inks are specially designed for painting metal and plastic miniatures. All colours are fully intermixable, enabling the discerning artist to render that *just right* shade of Goblin snot or Troll dribble. The latest addition to the range is the Citadel Expert Paint Set, a range of inks specially designed to complement the Citadel acrylics, and intended for the painter who wants to give his figures that special 'Citadel' look so often seen in the pages of the *White Dwarf* magazine. The transparent layer of colour that may be added with ink is suitable for both enriching existing colours and adding a stage of shading to the base layer of Citadel acrylic.

Citadel Colour acrylic paints contain more pigment and less medium compared to other, inferior paints, giving denser coverage, better mixability and superb value for money. All our paint is water-based, and non-toxic, so brushes and palettes can be cleaned with water. And, most importantly, it doesn't smell like a snotling's loincloth, which is more than can be said about some of the mail order trolls...

Don't forget, all models benefit from a proper undercoating before painting. Use P28 Smelly Power or a light coat of matt white enamel or cellulose paint of the type sold as car body paint. Many model shops sell spray cans of paint ideally suited for this purpose. Colours will only show properly if you undercoat your models before painting. You have been warned!

Citadel Brushes are numbered from size 000 (finest) to size 3 (largest). Each of the brushes has a particular use in the painting of miniatures.

- 000 For very fine detail - in particular, for black-lining edges, picking out equipment and painting eyes.
- 00 For detailed brushwork and for small areas of blending such as on a face, banner or shield design.
- 0&1 For medium areas of blending and shading, and for applying base colours to small areas.
- 2 For large areas of base colours and small to medium areas of dry-brushing.
- 3 For the base colours on larger figures, such as monsters, Dragons and vehicles, and for dry-brushing and washing medium-large areas.

THE PREDATOR

Boxed Set No: 001101

The Predator is the Imperium's assault tank combining highly effective firepower with mobility. Designed around the standard Rhino APC chassis, the Predator is armed with a pair of las-cannon and a turret-mounted auto-cannon. It is widely used by both the Space Marines and the Imperial Guard as an assault vehicle, breaking through enemy lines at the head of the advancing troops or moving rapidly across the battlefield using its heavy firepower to stop the enemy dead.

The Predator is a detailed hard plastic kit.
