CITADEL®

Welcome to Games Workshop's 2008 Citadel Miniatures Collector's Catalogue

Welcome to our first attempt to create a catalogue specifically covering showpiece models and dioramas, and alternative and unusual miniatures, together with the very best of our extensive historic archive. As such the Collectors range is intended to both complement and supplement our main ranges which aim to provide all the essential troops types, characters and machinery required to assemble an army for Warhammer or Warhammer 40,000 or build forces to play our The Lord of The Rings game. In selecting models for the 'Collectors' range we have used three main criteria as explained below.

Showpiece models are display pieces, often dioramas or set-pieces, primarily intended for painting and display rather than gaming. Although this is a small part of the Collectors range at the moment we hope to add more showpiece models over time.

Alternative models are metal alternatives to plastic models in the main range, or alternative character variants too numerous and varied to include in the main Catalogue. Some of these models have been drawn from previously discontinued ranges but compare well in quality to modern designs – others are brand new additions to the Collectors range.

Historic models are slices of Citadel's history – they are models that remain popular amongst collectors either because they have special significance as design landmarks (such as the Armour Through The Ages) or because they are charming, characterful or just plain quirky. Generally speaking, these models do not match the quality of modern designs and they are often significantly smaller.

Citadel has been manufacturing cast metal miniatures for almost 30 years – and during that time we have produced many thousands of different designs. Although the original rubber moulds used to make the miniatures wear out and perish over time, a carefully assembled archive of metal 'master' models is maintained enabling us to recreate many old 'classics'. Sadly, the archives are not 100% complete by any means. Some of the production methods used in the early days utilised conversions of the masters which were then destroyed during the moulding process. Other masters have been lost or damaged over time. Models designed to be cast in old-fashioned lead alloys may be impractical to cast using modern lead-free alloys and equipment. A proportion of our older models were produced under licenses that are no longer valid. Even so, we have an accessible archive of something like 16,000 different individual cast pieces.

Our policy is to maintain a catalogue of Collectors models of a size that we can reliably manufacture and supply. We can't hope to make all of our entire archives available at once, so instead we will cycle through our back-catalogues, dropping pieces where demand is low and adding pieces that are commonly asked for or which we think will be popular. Although models will always be retained in the range if there is genuine demand – we cannot guarantee that any models will be available year after year – and would suggest that serious collectors make purchases whilst models are available rather than taking a chance.

Our Collectors range is growing all the time as we add new models or recommission moulds from our archives. The complete and up-to-date catalogue will therefore be found on our web-site at www.games-workshop.com.

USING THIS CATALOGUE

About the Models

Most of the models in this catalogue are shown painted. All models are supplied unpainted. All miniatures are shown at ACTUAL SIZE, unless otherwise noted. All models that require a base are supplied with the correct plastic Citadel miniature slottabase.

The models shown in this catalogue are shown assembled. This is not how they are supplied. All models will require some assembly. Most models require nothing more complicated than affixing the miniature to its plastic base.

Showpiece

The strange and dangerous worlds of Warhammer and Warhammer 40,000 come to life under the sculptor's touch! We let our expert designers loose to explore the Warhammer and Warhammer 40,000 background universes however they liked – free from the constraint of making miniatures strictly for the gaming table. It has proven an interesting challenge – and here we see only the very first of what we hope will become a popular series with top painters and serious collectors.
