# MULTI-PART PLASTIC KIT

## Multi-Part Plastic Kits

The multi-part plastic kit is a boxed set that contains one or more plastic "frames" of models or component parts that can be clipped out and assembled in a variety of different poses and often with several choices for weapons or equipment.

Many multi-part plastic kits can make several options of model or troop type depending on which combination a modeller selects.

Other kits may allow for a variety of weapon combinations, upgrades, or accessories. To the right we have shown two differently assembled Temple Guard made from the Lizardmen Temple Guard box on page 98.

For each product that bears the multi-part plastic kit stamp we have shown a painted example of just some of the models that can be assembled and a brief description of all the models and/or weapon choices that are possible.

# OGRE KINGDOMS

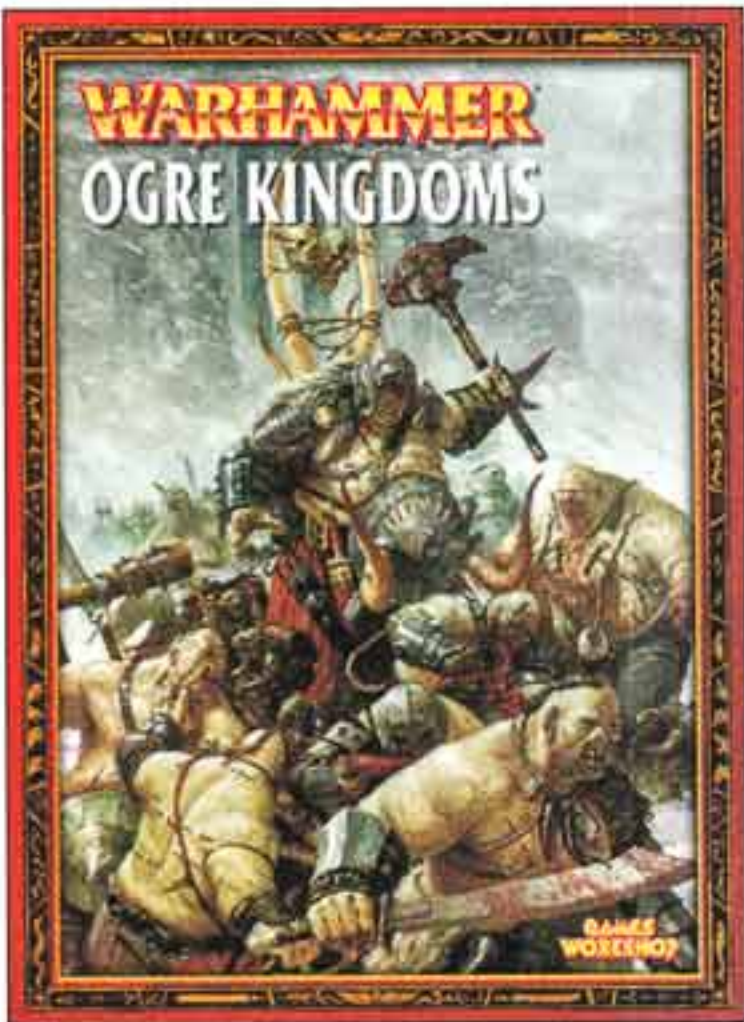

# GETTING STARTED

## WARHAMMER ARMIES: OGRE KINGDOMS

60030213001

Far to the east of the Old World, within the craggy valleys and cave networks of the Mountains of Mourn, lie the Ogre Kingdoms. For the first time these brutish monsters have begun to foray into the outside world, no longer in groups of two or three but in their hundreds. Ogres believe that might makes right, excelling at eating and fighting. An Ogre Kingdoms army is a massive, blunt instrument that smashes into enemy lines with the force of a ton of bricks.

This 80-page Warhammer Armies Book contains all the rules you'll need to field a Ogre Kingdoms army, as well as detailed background information, bestiary, accompanying artwork and 'Eavy Metal' showcase.

# ORCS & GOBLINS

## WARHAMMER ARMIES: ORCS & GOBLINS

The Orcs and Goblins are brutal and cunning and their only goal is to rampage and slaughter. Lacking lands in the same way as Men or Elves, Orcs are driven from battlefield to battlefield by their unquenchable lust for battle.

# DAEMONHUNTERS

## GETTING STARTED

## CODEX: DAEMONHUNTERS

The Inquisition is a secretive body, founded in the earliest days of the Imperium, to defend humanity against the alien, the witch and the heretic. Such is the power and authority wielded by an Inquisitor; he can call upon the services of every branch of the Imperium's armed forces, even the mighty Space Marines should the threat be great enough. Each Inquisitor is an exceptional individual with access to their own specialist troops. A Daemonhunter army can be bolstered by the awesome Grey Knights. Surpassing even their brother Space Marines in skill and ability and armed with psychically charged force weapons and an unshakable faith in the Emperor, there is no more daunting foe for a daemon to face.

The rules for using a Daemonhunters army can be found online at [www.games-workshop.com](http://www.games-workshop.com)

Note: Many of the miniatures that can be fielded in a Daemonhunters army can also be fielded in a Witch Hunters army. Rather than repeat them separately here these models can be found in the Witch Hunters section of this catalogue.

# DARK ELDAR

## GETTING STARTED

## CODEX: DARK ELДАР

60030112001

Inhabiting a realm called Commorragh, a place as dark and twisted as its rulers, the Dark Eldar launch piratical raids across the length and breadth of the galaxy. Their only purpose is to cause mayhem, steal, pillage and most importantly, to capture fresh victims to return home with. If any race could properly be called evil, it would be the Dark Elder. Devious, vain, and totally self-serving, they hold no respect for any living creature, not even themselves. Revelling in the pain and suffering they inflict, to be captured by them is a fate far worse than death.

This 48-page Warhammer 40,000 Codex contains all the rules you'll need to field a Dark Eldar army, as well as detailed background information, bestiary, accompanying artwork and 'Eavy Metal showcase.

# ELDAR

# GETTING STARTED

## CODEX: ELDAR 60030104003

Lost in the vastness of space, Eldar craftworlds float in utter isolation, their homeworlds destroyed during the Fall, the catastrophic collapse of their civilisation. Highly advanced and deadly, they are physically similar to humans but possessing minds as alien as an Orks. Even as their race is slowly dying, their Farseers look upon the many strands of fate in hope of preventing the coming of Chaos and the death of their race. When an Eldar army goes to war it is at the behest of these revered seers, tasked with ensuring something is protected, moved or destroyed. They strike hard and without warning, showing neither mercy nor remorse, for without their actions the universe would surely be doomed.

This 84-page Warhammer 40,000 Codex contains all the rules you'll need to field an Eldar army, as well as detailed background information, bestiary, accompanying artwork and 'Eavy Metal showcase.

## CODEX: IMPERIAL GUARD 60030105004

The Imperial Guard comprises countless billions of soldiers drawn from a million worlds who stand against the innumerable threats that would see the Imperium of Man torn asunder. Serried ranks of soldiers and columns of steel-clad tanks face monstrous savages and inhuman horrors. The Imperial Guard forms the very backbone of the Imperium, without which Mankind would surely fall prey to the predations of aliens, heretics and worse.

This 104-page Warhammer 40,000 Codex contains all the rules you'll need to field an Imperial Guard army, as well as detailed background information, bestiary, accompanying artwork and a full-colour 'Eavy Metal showcase.

## CODEX: NECRONS 60030110001

The Necrons are an alien race ancient beyond imagining, their miraculous technology far in advance of even the oldest races. Ponderous and inescapable as death itself, a Necron advance is terrifying. Skeletal warriors and eldritch monstrosities striking without warning, harvesting races such as humanity like mere cattle. The menace of the Necrons and their expansion grows with each passing year and could spell the doom of all.

This 64-page Warhammer 40,000 Codex contains all the rules you'll need to field a Necron army, as well as detailed background information, bestiary, accompanying artwork and 'Eavy Metal showcase.

## CODEX: ORKS 60030103003

Orks are the most warlike aliens in the 41st Millennium and their number is beyond counting. Should the Orks ever truly unify, they would crush all opposition and drown the civilised races in a tide of violence and gore. But the Ork's unquenchable thirst for violence sees them waging brutal wars against their own kind that only the strongest survive. When an exceptionally strong and ruthless Warboss arises and leads the Orks on the rampage, the galaxy trembles under the deafening echo of their mighty Waaagh!

This 104-page Warhammer 40,000 Codex contains all the rules you'll need to field an Ork army, as well as detailed background information, bestiary, accompanying artwork and 'Eavy Metal showcase.

# ORK STOMPA

## Ork Stompa 99120103021

As big as a fortress, a Stompa is a walking, shooting, roaring personification of an Ork god. A Stompa carries a fearsome array of weaponry, including blades capable of cutting a tank in two, supa-skorchas able to burn entire squads in one blast and the mighty Deth Kannon, which can destroy any enemy foolish enough to stand before the Orks.

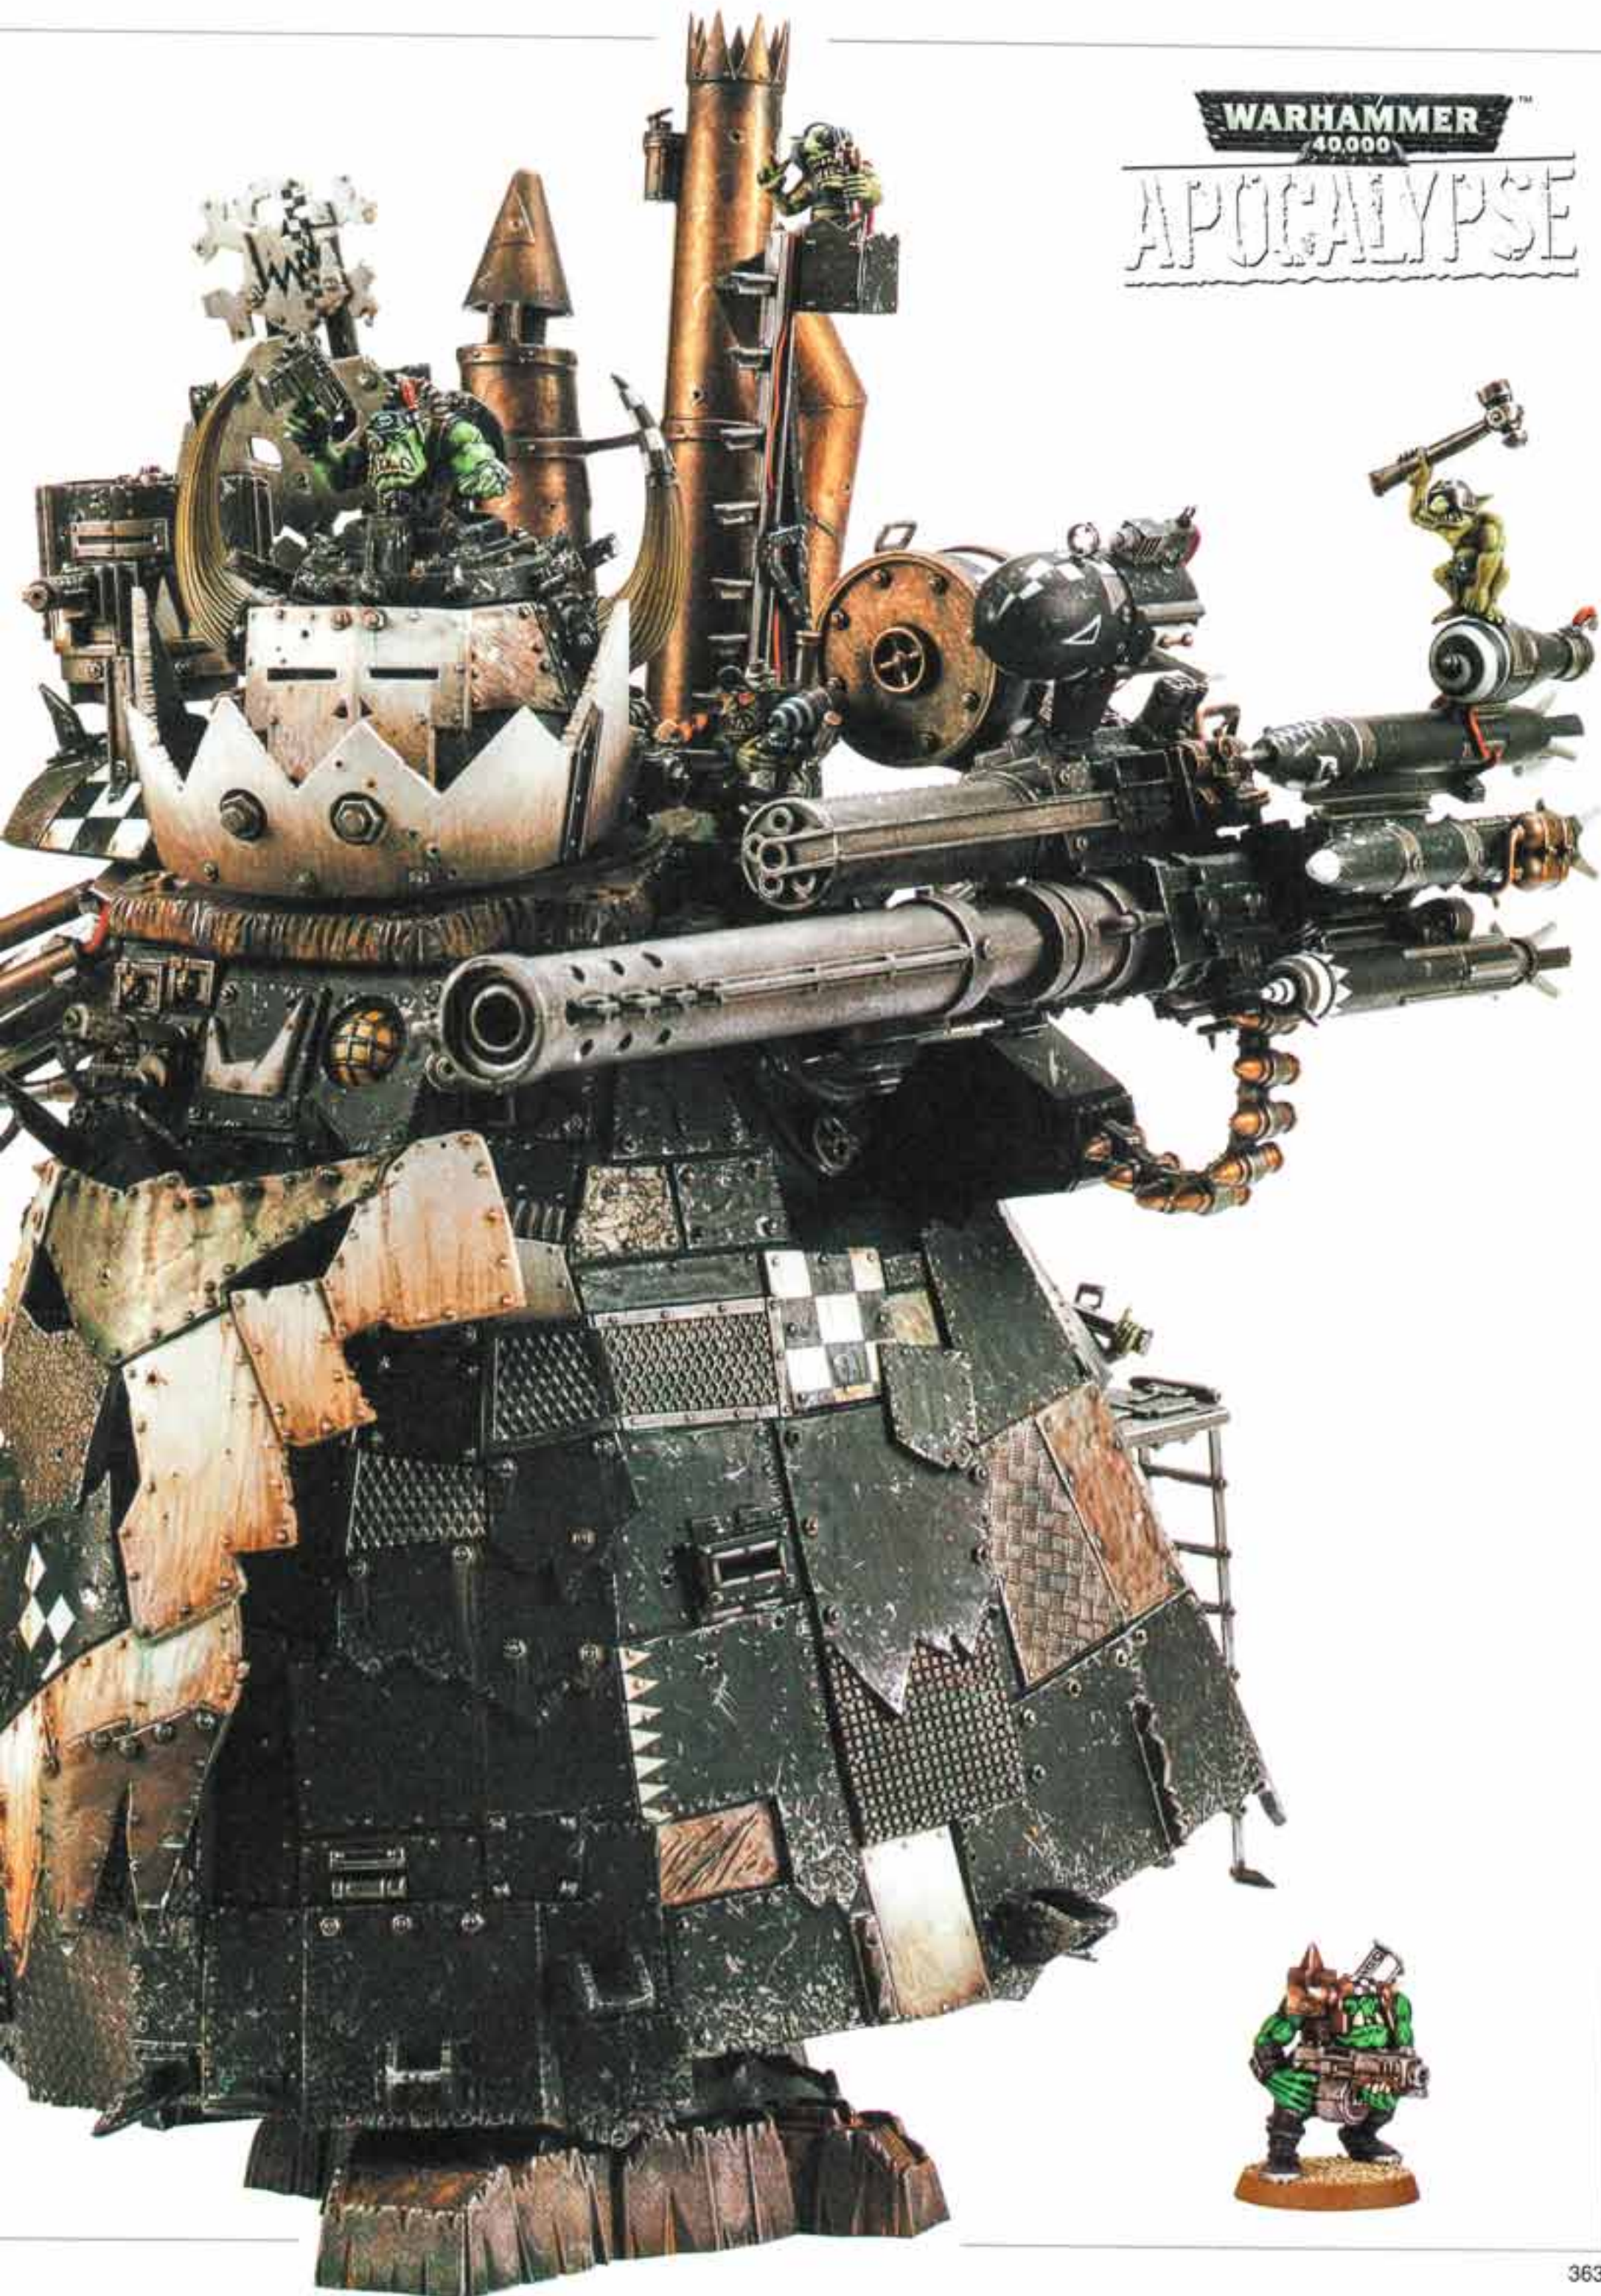

This multi-part plastic kit can be assembled as a Stompa. It contains a multitude of parts to assemble the model in a number of different ways. This is such a huge kit that it cannot be shown at full size. The Ork Boy miniature is shown to demonstrate the size of this gigantic kit but is not included.

# WITCH HUNTERS

## CODEX: WITCH HUNTERS

The Inquisition is a secretive body, founded in the earliest days of the Imperium, to defend humanity against the alien, the witch and the heretic. Such is the power and authority wielded by an Inquisitor; he can call upon the services of every branch of the Imperium's armed forces, even the mighty Space Marines should the threat be great enough. Each Inquisitor is an exceptional individual with access to their own specialist troops. A Witch Hunter army can be bolstered by the Sisters of Battle, shining examples of all that is good about humanity. The fighting arm of the Ecclesiarchy, they are armed with the finest armour and weapons and are among the best and bravest warriors an Inquisitor can call upon.

The rules for using a Witch Hunters army can be found online at [www.games-workshop.com](http://www.games-workshop.com)

Note: Many of the miniatures that can be fielded in a Witch Hunters army can also be fielded in a Daemonhunter army. Rather than repeat them separately here these models can be found in the Daemonhunter section of this catalogue.

The Lord of the Rings Strategy Battle Game allows two or more players to recreate scenes from The Lord of the Rings, from small skirmishes to massive tabletop battles. Lead The Fellowship of the Ring as they battle their way through Khazad-dûm, thwart the defenders of Helm's Deep, or take part in the glorious battles of the Pelennor Fields. A host of Citadel miniatures are yours to command, from mighty heroes to fearsome monsters.

At the close of the Third Age, a handful of great kingdoms control most of Middle-earth, but there are other powers hidden in forests and vales. Largely forgotten by the outside world, these lesser realms are rarely roused to wrath, but they should not be underestimated by the servants of Sauron.

# WARHAMMER 40,000

**Basilica Administratum**

99120199005

This set contains 1 plastic Basilica Administratum building.

**Sanctum Imperialis**

99120199008

This set contains 1 plastic Sanctum Imperialis building.

**Manufactorium**  
99120199009

This set contains 1 plastic Manufactorium building.

The Imperial Sector makes an amazing centerpiece to any Warhammer 40,000 battlefield. This plastic kit contains enough parts to make three small buildings and one large building, comprising a mix of Basilica Administratum, Sanctum Imperialis and Manufactorium Buildings.

 **Imperial Sector**  
99120199006

The Shrine of the Aquila was once a bastion of faith, but now only the ruined edifice still stands. This mighty piece of plastic terrain makes a fantastic centrepiece for any Warhammer 40,000 battlefield. The Shrine of the Aquila stands over 10 inches tall, contains three levels and is completely compatible with the existing Warhammer 40,000 Basilica Administratum, Sanctum Imperialis and Manufactorum sets. The kit contains 18 floor panels, giving your models plenty of elevation to get the best arcs of fire.

Shrine of the Aquila

The Aegis Defence Line is the perfect kit for any defender to start building their perimeter defences. The plastic kit comes with four double blast shield sections and four single blast shield sections that can be set up in a limitless array of configurations. Joined together they provide the defender with 28" of defence lines. Also included in the kit is a quad-gun emplacement, an interceptor weapon made up of four linked autocannons. The gun can be placed onto one of two different mounts supplied.

**Aegis Defence Line**  
99120199015

The Imperial Strongpoint is the ultimate set for creating a high impenetrable defence set-up. This massive kit includes two Bastions, two Icarus lascannons, three Quad-guns, two comms relays, 12 double blast shield sections and 12 single blast shield sections. That's an incredible 84" (over 6') of defence line! Because of the modular nature of the set, this kit can be combined with others to create truly immense fortifications or give you the option to spread your defensive lines across a larger area.

**Imperial Strongpoint**  
99120199019

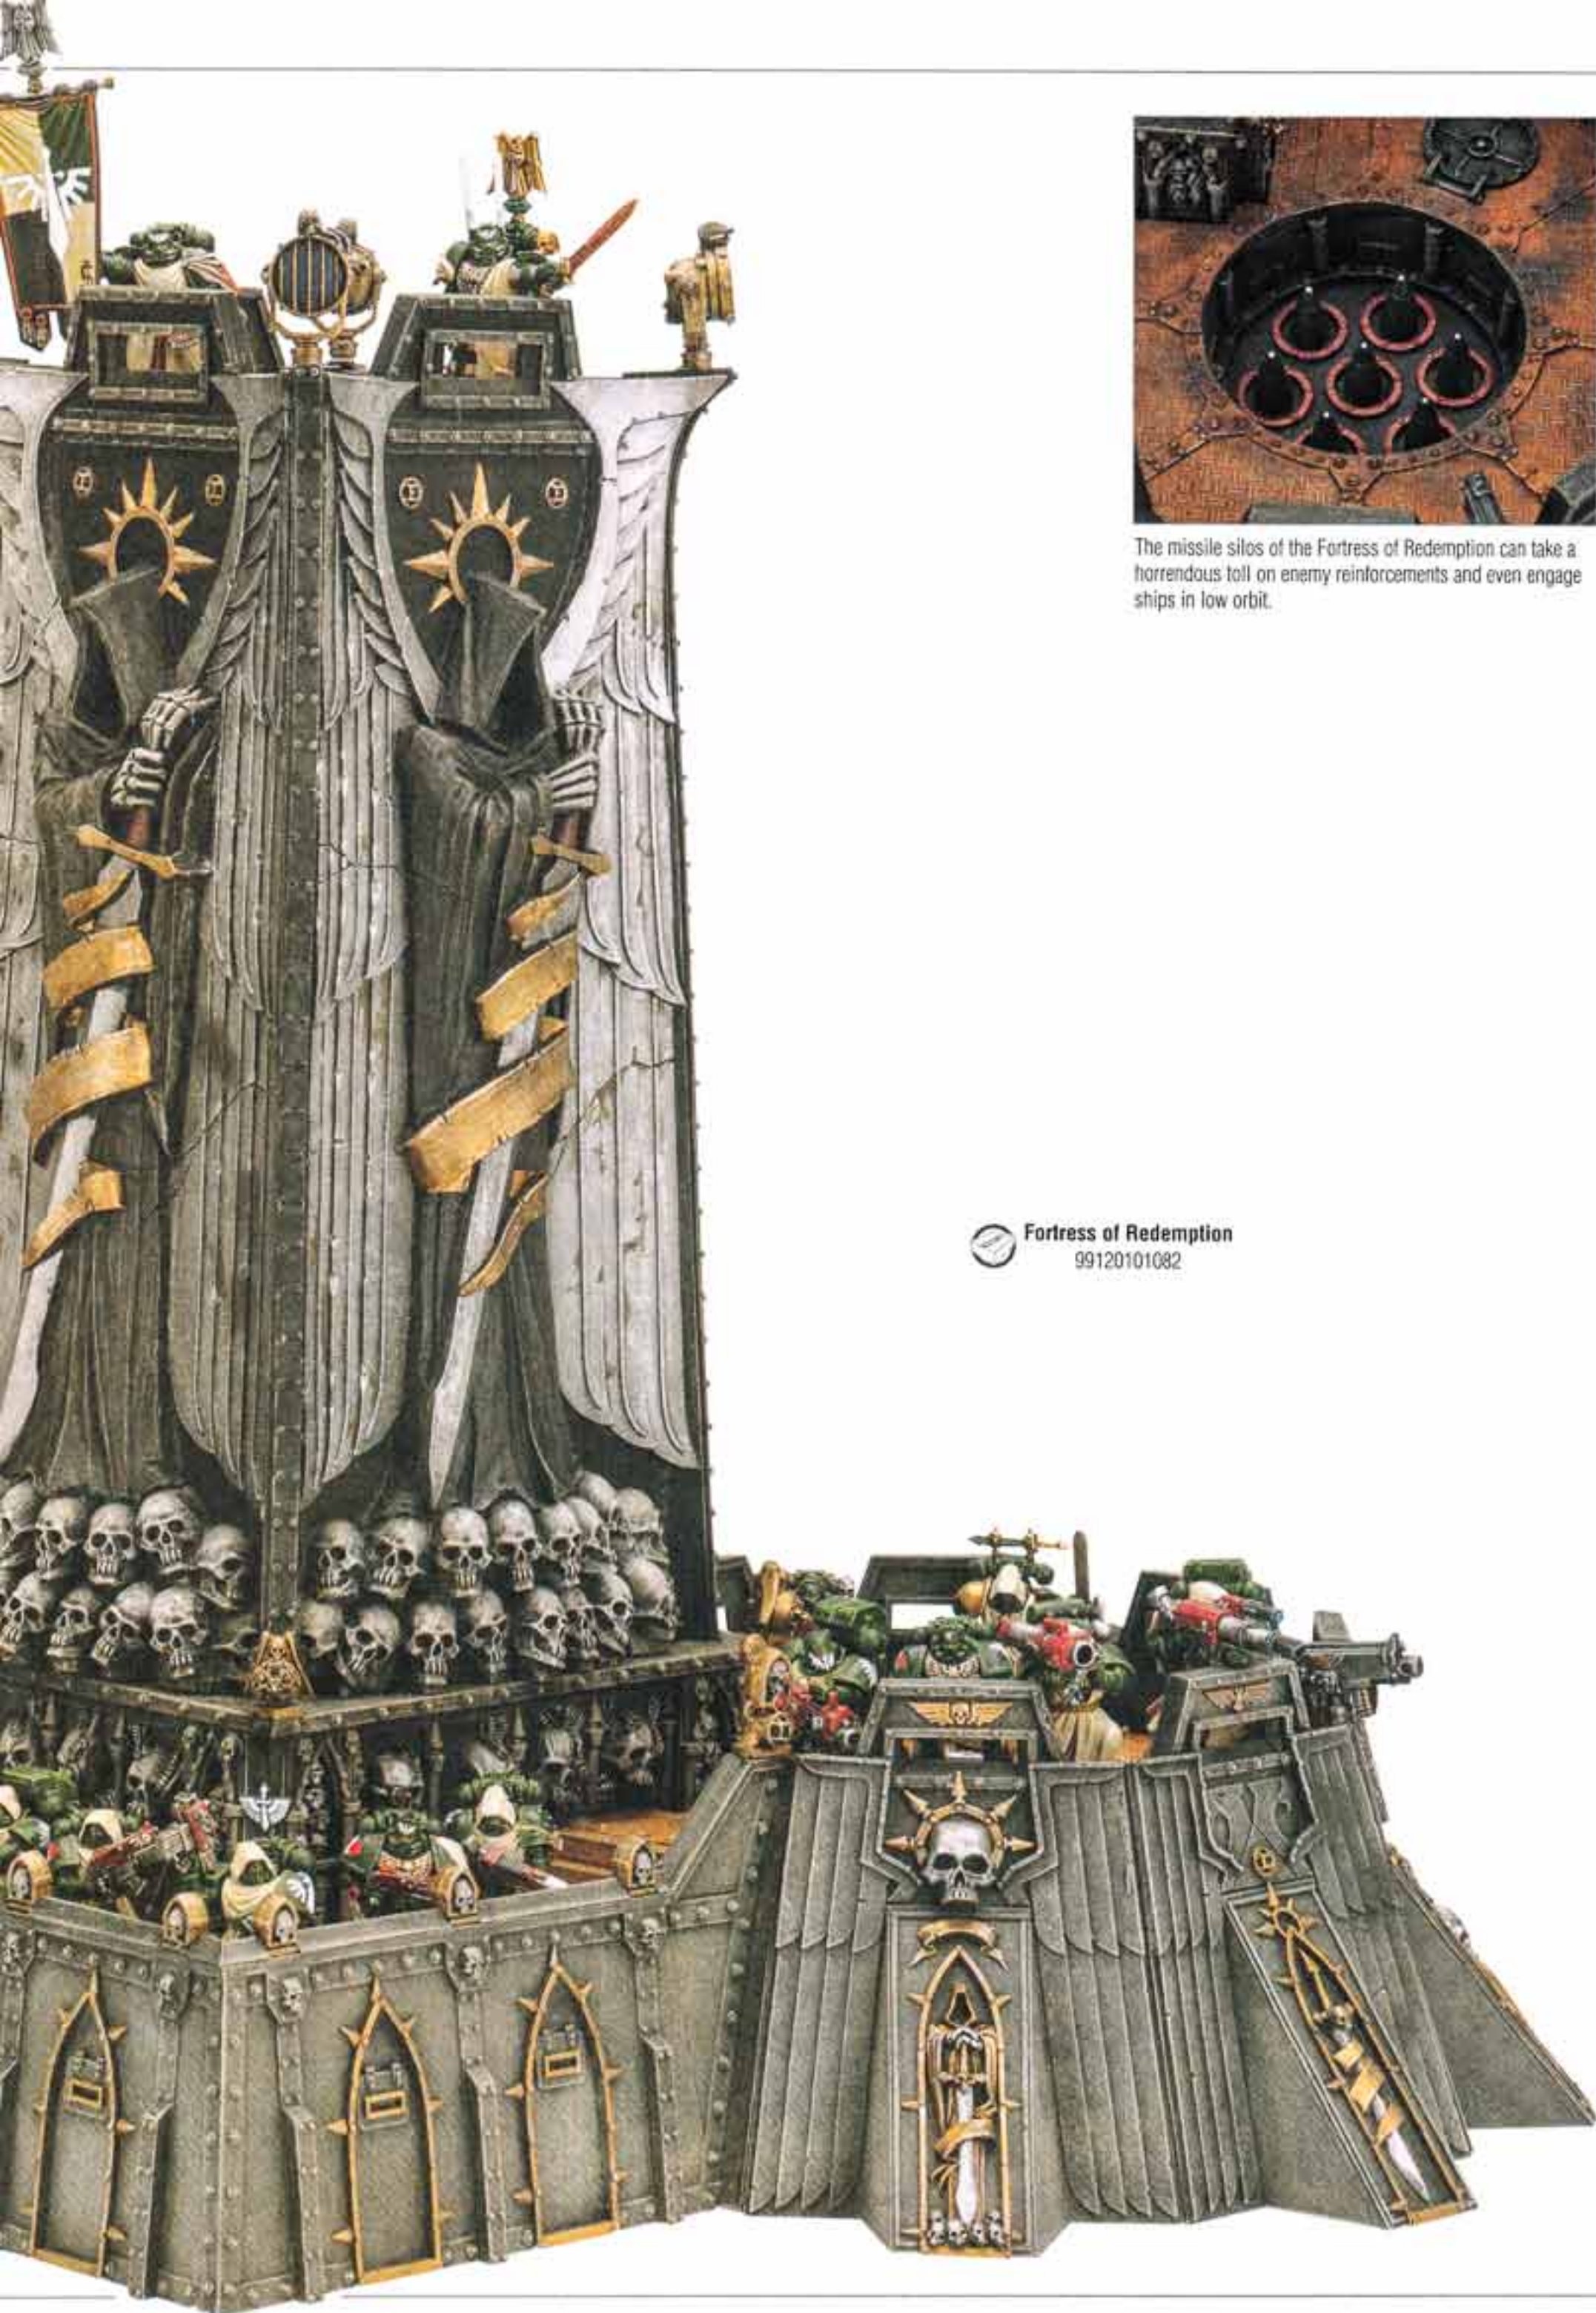

The most common type of indomitable fortress is known as the Fortress of Redemption, first used by the Dark Angels of the Adeptus Astartes. Since the days of the Great Crusade these unyielding fortresses have been an invaluable asset in the war against disorder. This plastic kit is so huge that it cannot be shown at full size. The Dark Angels Space Marine miniatures are shown to demonstrate the size of this gigantic kit but are not included.

The missile silos of the Fortress of Redemption can take a horrendous toll on enemy reinforcements and even engage ships in low orbit.

 **Fortress of Redemption**  
99120101082

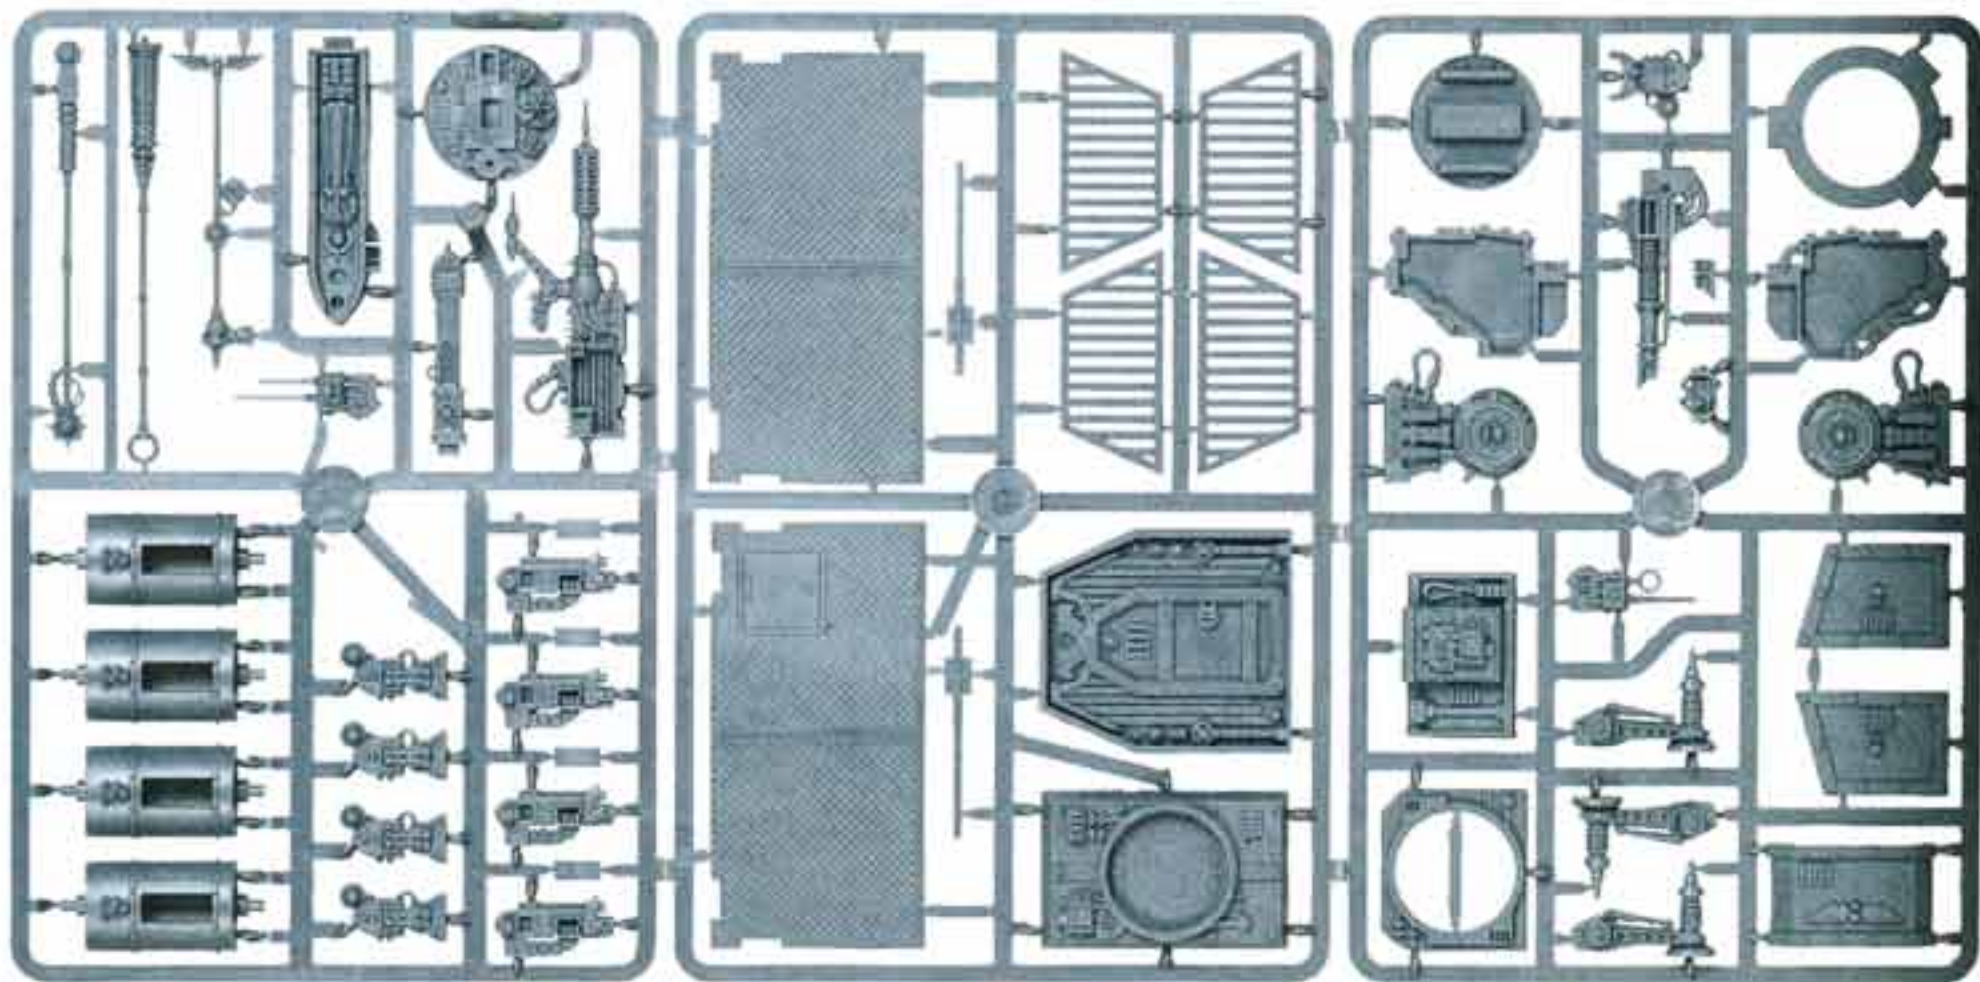

Imperial Bastions are the mighty bulwarks of the Imperium's planetary defences, brimming with heavy weapons and guarded by thick walls to shelter the troops within. This plastic set contains all the components needed to create a complete bastion, including an Icarus-pattern lascannon. The bastions are fully modular, so by joining two or more kits together you can vary the height of your bastions, leading to more impressive set-ups. From a gaming perspective this has the advantage of providing more automated weapons and fire ports for squads sheltering inside.

The Skyshield Landing Pad is not only an excellent addition to any scenery collection, but also plays a very active role in games of Planetstrike. This plastic kit can be assembled so that the crenellated battlements can be raised or lowered. A landing pad with unfurled crenellations is great for quickly disembarking troops from skimmers onto, whilst raised battlements provide extra protection.

# COLLECTORS RANGE

The worlds of Warhammer and Warhammer 40,000 come to life at the hands of the Citadel sculptors. With the Collectors Range, our expert designers are free to explore these universes however they like, creating bespoke miniatures for the discerning collector.

The miniatures in the Collectors Range are display pieces, often dioramas or set-pieces, primarily intended for painting and display rather than gaming. Although this is a small part of the range at the moment we hope to add more Collectors models over time.

The following pages showcase some examples of the models in the Collectors Range. To see more and to purchase, visit our web site:

[www.games-workshop.com](http://www.games-workshop.com).

This set of hatchling and juvenile dragons has been sculpted by expert creature-maker, Trish Carden. The Baby Dragon set comprises five models; two young dragons, two hatched eggs and a rocky, bone-strewn nest. Inside the nest are three eggs yet to hatch, no doubt containing the next generation of these legendary creatures.

Greenskins live for violence, and in the absence of any enemies they will cheerfully fight amongst themselves. This model, sculpted by Alex Hedström, portrays two Orc Boyz settling their differences with their fists and an unfortunate Night Goblin.

A real gem from the archives. This set of Goff Rockers were sculpted in the 80's by Kev Adams when Warhammer 40,000 and hair metal went hand-in-hand.

This vignette sculpted by Thais Mariblanca López consists of three characterful models. The small Squig is being chased by the hungry Night Goblin who in turn is being chased by an even hungrier, and even larger, Cave Squig.

# Specialist Games

If you've collected an army for Warhammer, Warhammer 40,000 or The Lord of The Rings Strategy Battle Game, and you now fancy trying something a bit different within the Games Workshop hobby, then the Specialist Games range is for you.

At present the Specialist Games range includes the following games: Blood Bowl, Warmaster, Epic Armageddon, Battlefleet Gothic, Mordheim, Necromunda, Inquisitor and The Battle of Five Armies.

Each game has an original background setting based within the worlds and universe of Warhammer, Warhammer 40,000 and The Hobbit. From leading a vicious gang in the dilapidated Underhives of Necromunda, marshalling tens of thousands of troops over the great battlefields of the Old World, commanding two-mile long cathedral battleships, coaching an all-star sports team, or going undercover deep in the lair of a Chaos cult - the possibilities are endless.

Each game in the Specialist Games range has also been designed to highlight a certain facet of the hobby – you may want to collect and paint miniatures that are in a different scale, or wish to develop a gang or team in a league or campaign environment; you may wish to role-play or tell stories through your games; or play games whose rules provide different tactical and strategic challenges; or you may just want to push spaceships about on the table top!

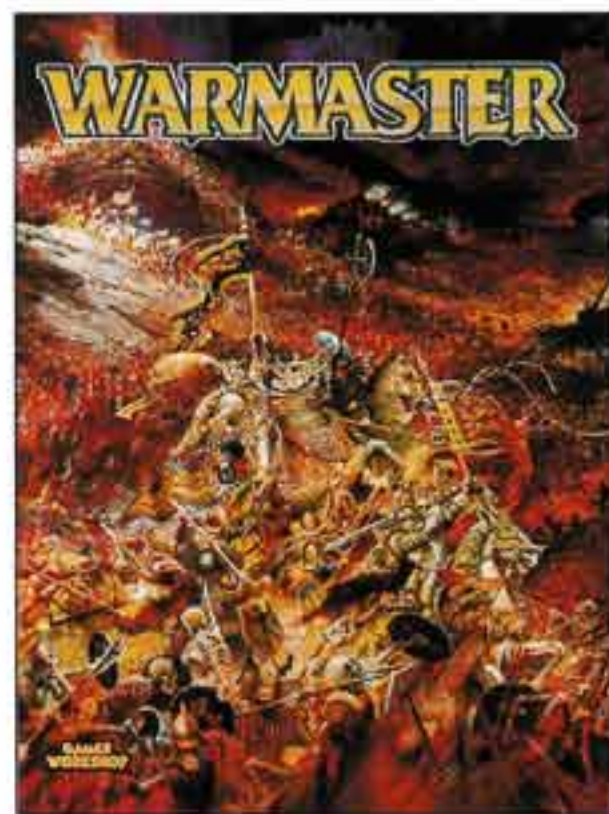

You can order the miniatures from [www.games-workshop.com](http://www.games-workshop.com), where you will find the most up-to-date version of the Specialist Games Catalogue, or you can ask the staff in your local Games Workshop store to order them for you.

Last, but very far from least, you can find the rules for many of the games in the Specialist Range on our website as a free (yes, free!) downloadable rulebook, along with a large database of articles and player-aids as well.
