DARK ANGELS LEGION

INTEREMPTORS

Even among the brethren of the infamous Dreadwing, the Interemptors are a grim breed, dedicated as they are to a singular purpose – the utter annihilation of the enemy. Armed with fearsome plasma burners and plasma incinerators, when the Interemptors attack they leave behind no trace of those they conquer – no bodies, no ruins, nothing. They take no trophies of their victories and tell no tales of those that have fallen before them, those consigned to death at their hands are forgotten forever. They are the Lion's ultimate sanction, his final curse for those foolish enough to stand before the First Legion.

THIS IS NOT A TOY

Not suitable for children under 15 years of age.

WARNING: Resin dust can be harmful if inhaled. Always wear a dust mask or respirator when sanding or sawing resin parts.

0011 44 115 900 4995 from Australia

00 44 115 900 4995 from Europe and the rest of the world.

Preparing a Model for Assembly

Before assembling a model, wash each part thoroughly with an abrasive brush, such as a toothbrush, to remove any model release agent that may still be on the surface of the parts. Then, remove any excess resin such as mould lines, casting gates, vents and shims.

For a more detailed guide to working with resin models, go to the Downloads section of the Forge World website.

This kit contains all of the pieces required to construct a unit of five Dark Angels Legion Interemptors. To glue the resin pieces together, use Citadel Super Glue.

NOTE: We have cast this kit using advanced techniques and the best quality resin, but due to the nature of the casting process, your model may contain small air bubbles. These can be filled with model filler or super glue. Any slight warpage of thin parts can easily be corrected by immersing the part in hot tap water for about 1 minute, then carefully bending it back into shape.
