PREPARING THE MODEL FOR ASSEMBLY

Before assembling the model, wash each part thoroughly with an abrasive brush, such as a toothbrush, to remove any model release agent that may still be on the surface of the parts. Then, remove any excess resin such as mould lines, casting gates, vents and shims. For a more detailed guide to working with resin models, go to the Downloads section of the Warhammer Community website.

This kit contains all the pieces required to construct Horus Ascended. To glue the resin pieces together, use super glue.
