8. Helmet
9. Left Leg
10. Left Pauldron
11. Left Arm
12. Tasset Armour
13. Thunder Hammer
14. Rock

 Part For Assembly

 Glue Contact Area

 Assembly Option

 Remove Shim

Before assembling the model, wash each part thoroughly with an abrasive brush, such as a toothbrush, to remove any model release agent that may still be on the surface of the parts. Then, remove any excess resin such as mould lines, casting gates, vents and shims. For a more detailed guide to working with resin models, go to the Downloads section of the Warhammer Community website. To glue the resin pieces together, use super glue.
