This kit contains all the pieces required to make a Ork War Kopta  
To glue the resin pieces either together or to plastic components use Citadel  
Super Glue.

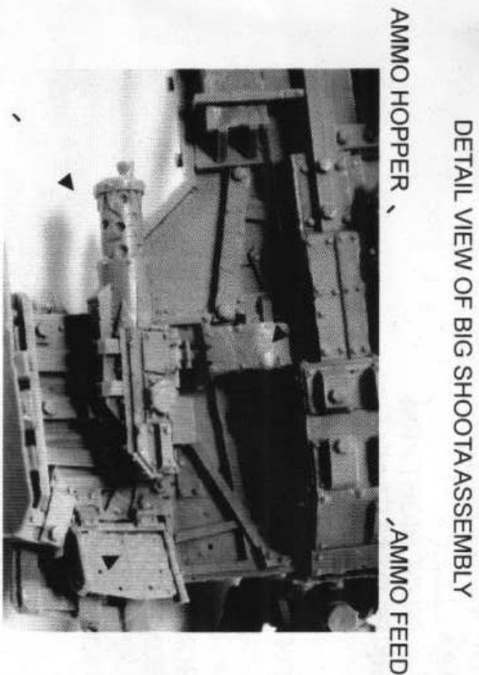

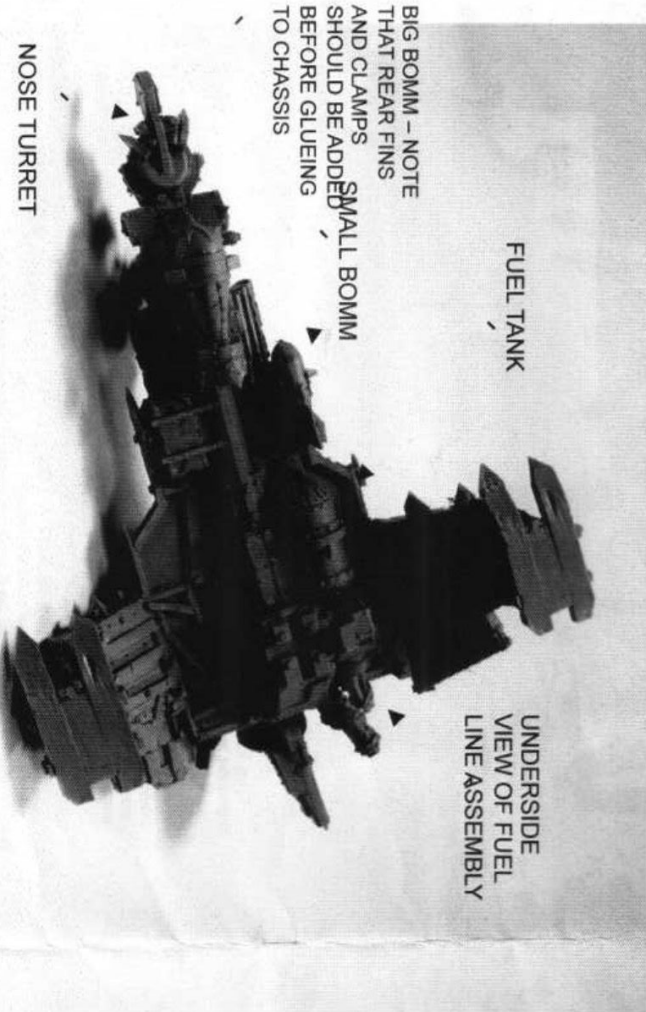

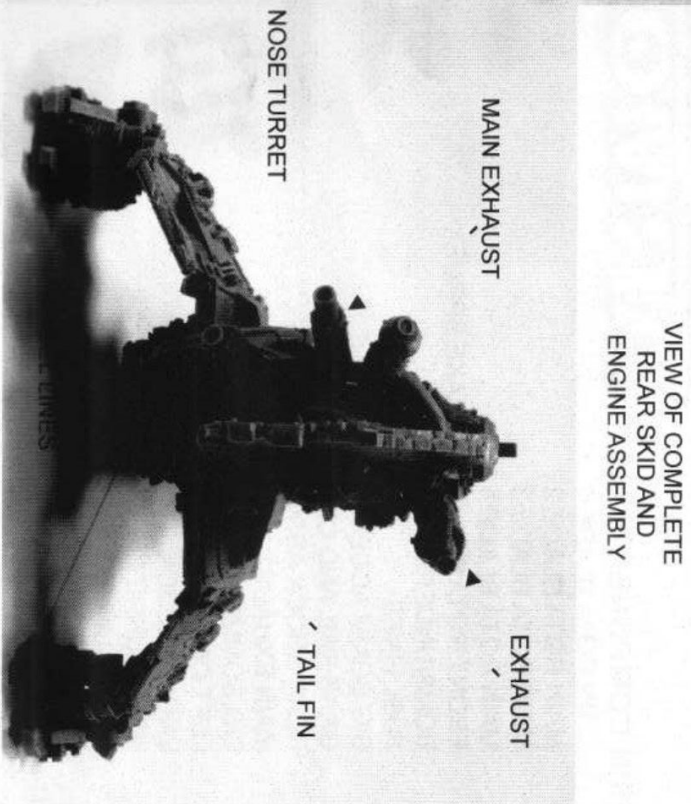

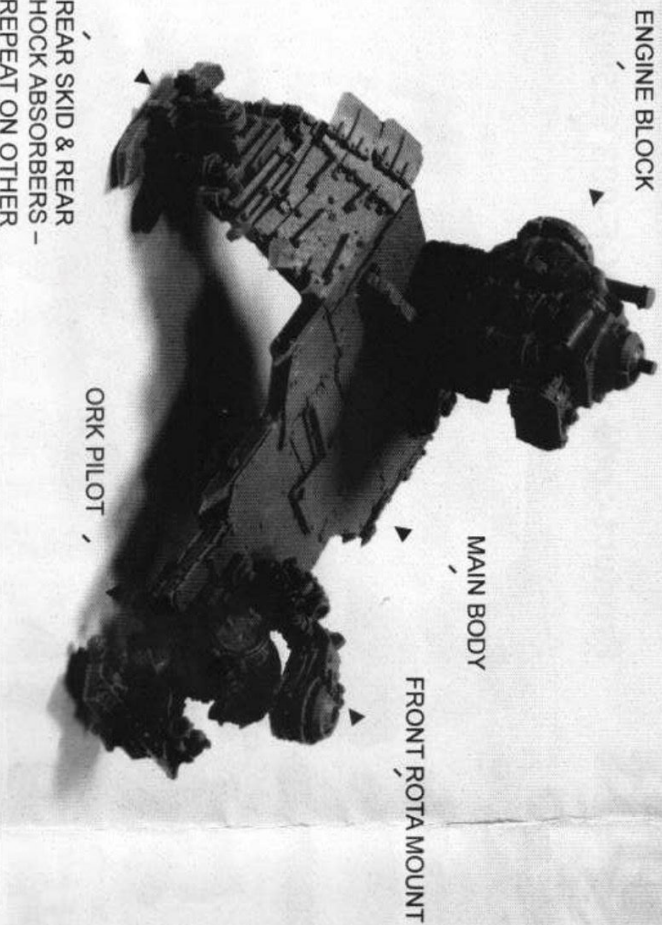

NOTE: We have cast this conversion kit using the most advanced techniques  
and the best quality resin, but due to the nature of the casting process your  
model may contain very slight air bubbles. These can easily be filled with  
model filler or super glue. Any slight warpage of thin parts can easily be  
corrected by immersing the part in hot tap water for about 1 minute then  
carefully bending it back into shape.
