# IRON WARRIORS LEGION

## TYRANT SIEGE TERMINATORS

*Tyrant Siege Terminators are the vanguard of any Iron Warriors siege breaker formation. Clad in thick Cataphractii plate and spitting a relentless hail of high explosive missiles from their carapace-mounted cyclone missile launchers, these implacable warriors are fortress-breakers of unparalleled skill.*

THIS IS NOT A TOY

Not suitable for children under 15 years of age.

WARNING: Resin dust can be harmful if inhaled. Always wear a dust mask or respirator when sanding or sawing resin parts.

## Preparing the Model for Assembly

Before assembling the model, wash each part thoroughly with an abrasive brush, such as a toothbrush, to remove any model release agent that may still be on the surface of the parts. Then, remove any excess resin such as mould lines, casting gates, vents and shims.

For a more detailed guide to working with resin models, go to the Downloads section of the Forge World website.

This kit contains all the pieces required to construct a unit of five Tyrant Siege Terminators. To glue the resin pieces together, use Citadel Super Glue.

NOTE: We have cast this kit using advanced techniques and the best quality resin, but due to the nature of the casting process, your model may contain small air bubbles. These can easily be filled with model filler or super glue. Any slight warpage of thin parts can easily be corrected by immersing the part in hot tap water for about 1 minute, then carefully bending it back into shape.

**!** Each Tasset component is matched to a specific pair of legs. The casting well attached to the component should have an identifying letter to assist with matching them up.

Another way to check is to look at the direction that the Tasset moves in and match it with the legs that are moving in a similar direction.

**!** Each Missile Launcher has a matching half with the same rivet pattern at the top of both.

**!** As an option, part 32. Targeter can be used to help identify which model is the Tyrant Siege Master. This part fits between the two missile launcher pods.
