LEGIO CUSTODES

AQUILON TERMINATOR SQUAD

Based upon the highly successful Terminator Dreadnought Armour project developed for the Legiones Astartes, Aquilon pattern Terminator armour greatly enhanced the already formidable physique of Legio Custodes warriors without sacrificing their legendary speed and manoeuvrability in combat.

Equipped in this way, on those rare occasions when the Legio Custodes were tasked with fighting in the tight, hellish confines of 'Zone Mortalis' operations or storming a breach in enemy defences, the Aquilon Terminator Sodalites were sent forth, their superior armour providing them with greater protection as well as the ability to carry weapons far more destructive in battle than their comrades-in-arms.

THIS IS NOT A TOY

Not suitable for children under 15 years of age.

WARNING: Resin dust can be harmful if inhaled. Always wear a dust mask or respirator when sanding or sawing resin parts.

Preparing the Model for Assembly

Before assembling the model, wash each part thoroughly with an abrasive brush, such as a toothbrush, to remove any model release agent that may still be on the surface of the parts. Then, remove any excess resin such as mould lines, casting gates, vents and shims.

For a more detailed guide to working with resin models, go to the Downloads section of the Forge World website.

This kit contains all the pieces required to construct a squad of three Legio Custodes Aquilon Terminators. To glue the resin pieces together, use Citadel Super Glue.

NOTE: We have cast this kit using advanced techniques and the best quality resin, but due to the nature of the casting process, your model may contain small air bubbles. These can be filled with model filler or super glue. Any slight warpage of thin parts can easily be corrected by immersing the part in hot tap water for about 1 minute, then carefully bending it back into shape.

If you need to contact the Forge World Customer Service team regarding this model, you can get in touch via email - forgeworld@gwplc.com - or call:
