# LEGIO CUSTODES AQUILON TERMINATORS WITH INFERNUS FIREPIKES

*Based upon the highly successful Tactical Dreadnought Armour project developed for the Legiones Astartes, Aquilon pattern Terminator Armour greatly enhanced the already formidable physique of Legio Custodes warriors without sacrificing their legendary speed and manoeuvrability in combat.*

*Those tasked with wielding the Infernus Firepikes served to present a mobile shield wall against a foe, unleashing searing arcs of flame to force an enemy away from strategically valuable assets.*

**THIS IS NOT A TOY**

Not suitable for children under 15 years of age.

**WARNING:** Resin dust can be harmful if inhaled. Always wear a dust mask or respirator when sanding or sawing resin parts.

## Preparing the Model for Assembly

Before assembling the model, wash each part thoroughly with an abrasive brush, such as a toothbrush, to remove any model release agent that may still be on the surface of the parts. Then, remove any excess resin such as mould lines, casting gates, vents and shims.

For a more detailed guide to working with resin models, go to the Downloads section of the Forge World website.

This kit contains all the pieces required to construct a squad of three Legio Custodes Aquilon Terminators with Infernus Firepikes. To glue the resin pieces together, use Citadel Super Glue.

**NOTE:** We have cast this kit using advanced techniques and the best quality resin, but due to the nature of the casting process, your model may contain small air bubbles. These can be filled with model filler or super glue. Any slight warpage of thin parts can easily be corrected by immersing the part in hot tap water for about 1 minute, then carefully bending it back into shape.
