# LEGION SICARAN

## OMEGA TANK DESTROYER

*Retrofitted to allow the Sicaran hull to carry heavier firepower, the Omega is a formidable tank hunter. It utilises the speed provided by the Sicaran's engines to apply overwhelming short range firepower in battle, racing forwards to ambush and obliterate the lumbering siege tanks of enemy columns.*

*Its simplified, some might say crude, systems are all capable of being produced by the lesser forges attached to many Space Marine strongholds, allowing them to replace losses of more complex vehicles even as the various Forge Worlds became isolated by war and mistrust at the height of the Horus Heresy. The main weaponry of the Omega reflects this stopgap approach, being imperfect, over-sized copies of the Mechanicum's plasma-fusil weaponry and relying on the brutal application of overwhelming force to reduce enemy armour to wrecks instead of the precise annihilation of more advanced weapons.*

THIS IS NOT A TOY

Not suitable for children under 15 years of age.

WARNING: Resin dust can be harmful if inhaled. Always wear a dust mask or respirator when sanding or sawing resin parts.

# Components

Before assembly, check that none of the components are missing.

1. Front Glacis Plate
2. Lower Hull
3. Engine
4. Main Hull
5. Right Track Unit
6. Left Track Unit
7. Large Exhaust x2
8. Small Exhaust x2
9. Hull Hatch
10. Retaining Plate
11. Heavy Bolter Turret
12. Hull Heavy Bolter
13. Sponson Retaining Plate x2
14. Sponson Ring x2
15. Sponson Turret x2
16. Gun Shield x2
17. Sponson Lascannon x2
18. Sponson Targeter x2
19. Lascannon Lower Pivot x2
20. Lascannon Power Cable x2
21. Sponson Heavy Bolter x2
22. Heavy Bolter Ammo Drum x2
23. Heavy Bolter Lower Pivot x2
24. Turret
25. Targeter
26. Right Omega Plasma Generator
27. Left Omega Plasma Generator
28. Right Omega Plasma Barrel
29. Left Omega Plasma Barrel
30. Cooling System Cables x6
31. Fuel Flasks x4
32. Vision Block

## Preparing the Model for Assembly

Before assembling the model, wash each part thoroughly with an abrasive brush, such as a toothbrush, to remove any model release agent that may still be on the surface of the parts. For more detailed information, consult the working with resin guide included in this box.

This kit contains all the pieces required to construct a Legion Sicaran Omega Tank Destroyer. To glue the resin pieces together, use Citadel Super Glue.

**NOTE:** We have cast this kit using advanced techniques and the best quality resin, but due to the nature of the casting process, your model may contain small air bubbles. These can easily be filled with model filler or super glue. Any slight warpage of thin parts can be corrected by immersing the part in hot tap water for about 1 minute, then carefully bending it back into shape.

If you need to contact the Forge World Customer Service team regarding this model, you can get in touch via email - [forgeworld@gwplc.com](mailto:forgeworld@gwplc.com) - or call:  
 0115 900 4995 within the UK  
 011 44 115 900 4995 from the USA and Canada  
 0011 44 115 900 4995 from Australia  
 00 44 115 900 4995 from Europe and the rest of the world.

**!** To allow the Sponson Turret to turn, apply a small amount of glue to the centre of the Sponson Retaining Plate, as indicated above.

9

10

**!** For the Lascannon option, omit stages 9 and 10.

**!** The Targeter and the Lower Pivot should be glued into the body of the chosen weapon. So the weapon will traverse, avoid getting glue on the Sponson Turret itself.

11

12

**!** Repeat stages 7 to 12 for both Sponson Turrets.

13

14

**!** Repeat this stage for part 27. Left Omega Plasma Generator.
