19. Antennae x2

This kit contains all the resin and plastic pieces required to make a Necron Tomb Sentinel.
To glue the resin pieces either together or to plastic components use Citadel
Super Glue.

NOTE: We have cast this conversion kit using the most advanced techniques and the best quality resin, but due to the nature of the casting process your model may contain very slight air bubbles. These can easily be filled with model filler or super glue. Any slight warpage of thin parts can easily be corrected by immersing the part in hot tap water for about 1 minute then carefully bending it back into shape.

THIS IS NOT A TOY

Not suitable for children under 15 years of age.

WARNING: Resin dust can be harmful if inhaled. Always wear a dust mask or respirator when sanding or sawing resin parts.

~If you plan to pose the model!
over some interesting terrain
feature a good idea is to tack it
in place before you glue the
body together. That way you
can easily determine before
hand which pose works best.

** You get 24 legs in 6 different poses as part of the kit. You will only need 20 for the finished model. This is to help you to pose the model as you like.

Using a lump of sticky tack you can hold the body in place while you glue the legs on to the body.

13. TERTIARY VELOCITATORS

18. EXILE RIFT STABILISERS

19. ANTENNAE
