1 Apply as little glue as possible to avoid obscuring details.

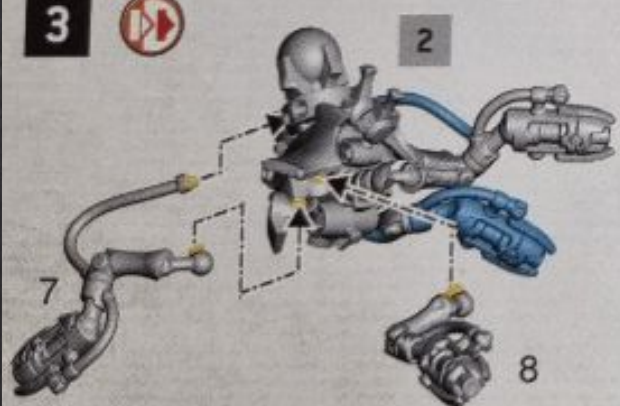

2

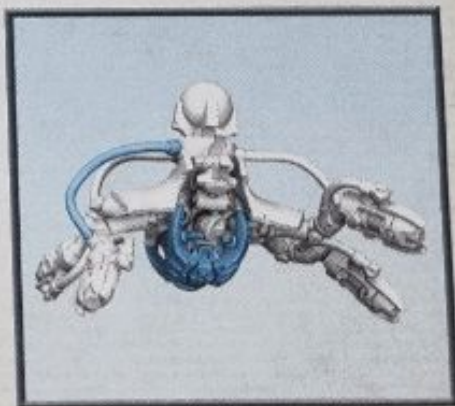

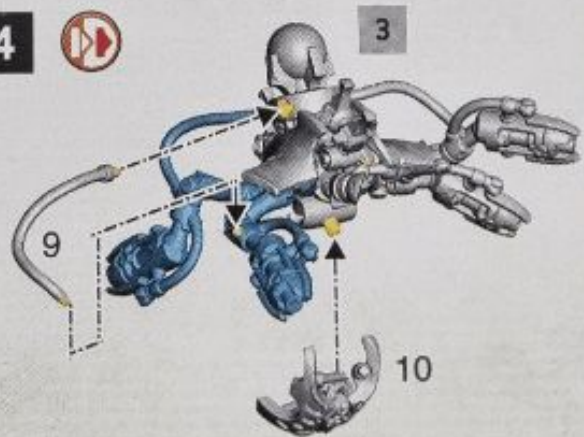

It is important to dry fit all cables before applying glue as they can be a little fiddly to align.

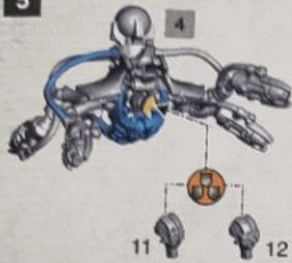

3

4

5

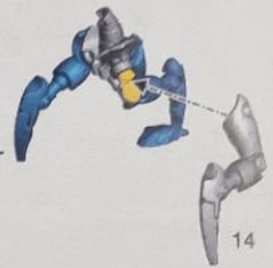

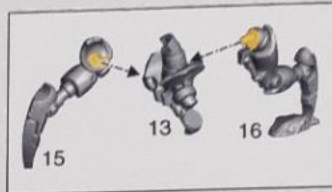

ALTERNATE HEAD

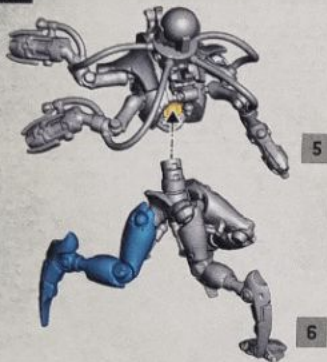

This kit has two head options. Feel free to use whichever head you wish. This issue's paint guide shows component 12.

6

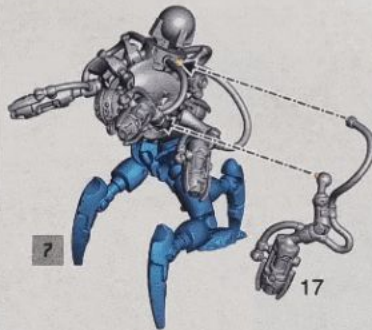

When gluing the legs into position, hold the components in place for a few seconds as the glue sets.

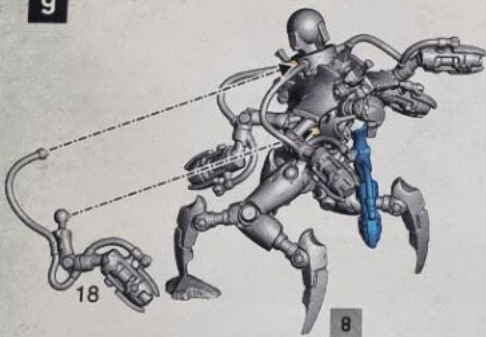

7

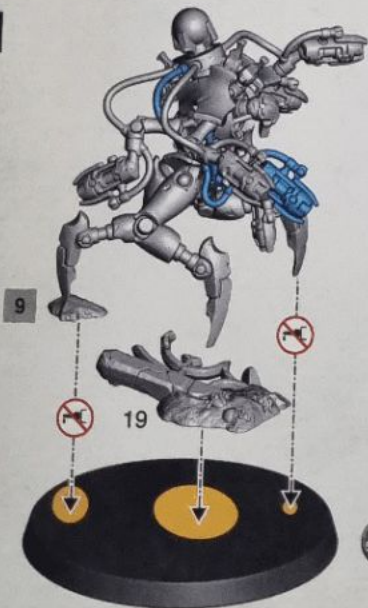

8

9

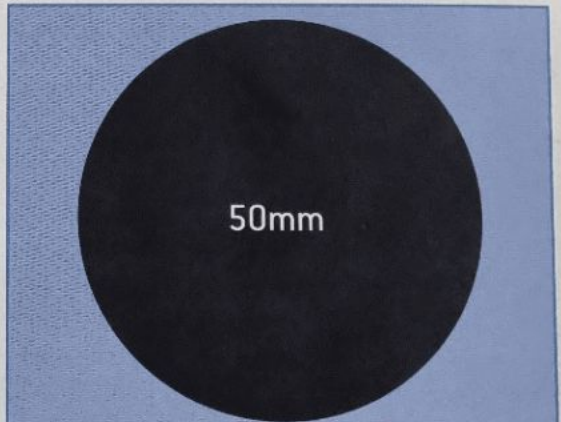

10

Glue the piece of scenery (component 19) to the base, but do not glue the Hexmark Destroyer into position yet. You will glue the model into position after you have finished painting it.

TWO PARTS

Do not glue the Hexmark Destroyer to the base until it has been fully painted.

50mm

50MM BASE

Attach the Hexmark Destroyer to the 50mm base.

Take one last look at your model and make sure you have attached all cables and other small components before continuing to the paint guide.
