NIGHT LORDS CONTEKAR TERMINATOR ELITE

Contekar Elite Terminators are butchers and murderers of the highest order, armed with the cruelest weapons in the arsenal of the Night Lords and skilled in their use both on the battlefield and in the infamous slaughter pits of the VIIIth Legion. The Contekar Elite's talents for steadfast ruthlessness in the prosecution of war was much vaunted amongst the Legions during the Great Crusade, where they caused panic and dismay among the foe with their mere arrival on the field of battle. The Contekar were to be called upon when the VIIIth Legion wished to bring utter and abject despair and destruction upon a foe, to burn their armies and topple the foundations of their civilisation.

Preparing a Model for Assembly

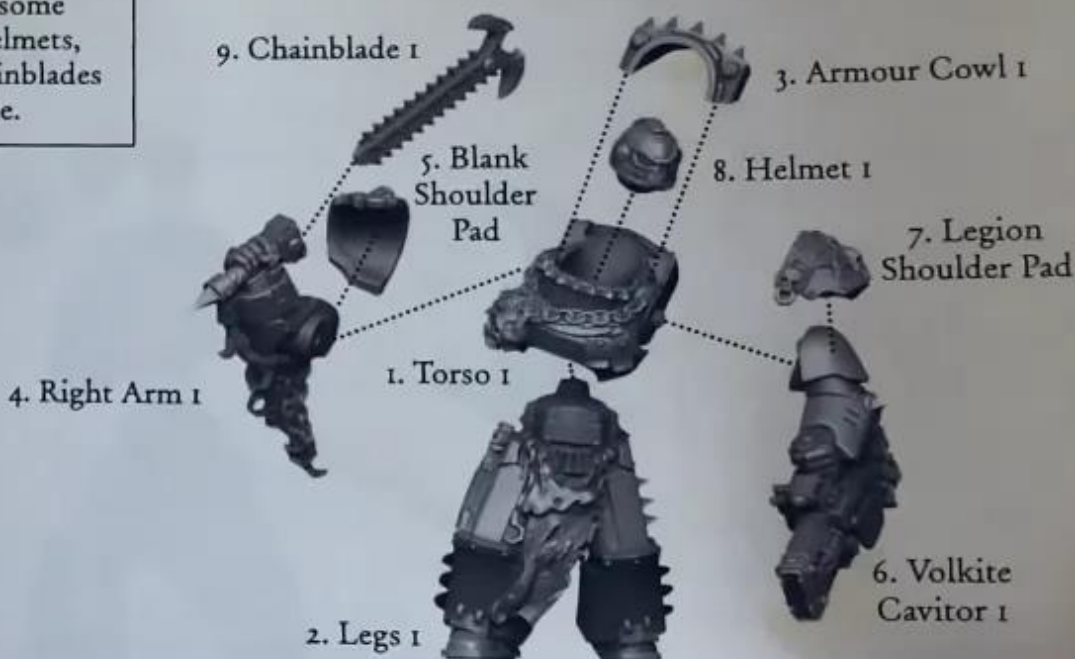

Before assembling a model, wash each part thoroughly with an abrasive brush, such as a toothbrush, to remove any model release agent that may still be on the surface of the parts. Then, remove any excess resin such as mould lines, casting gates, vents and shims.

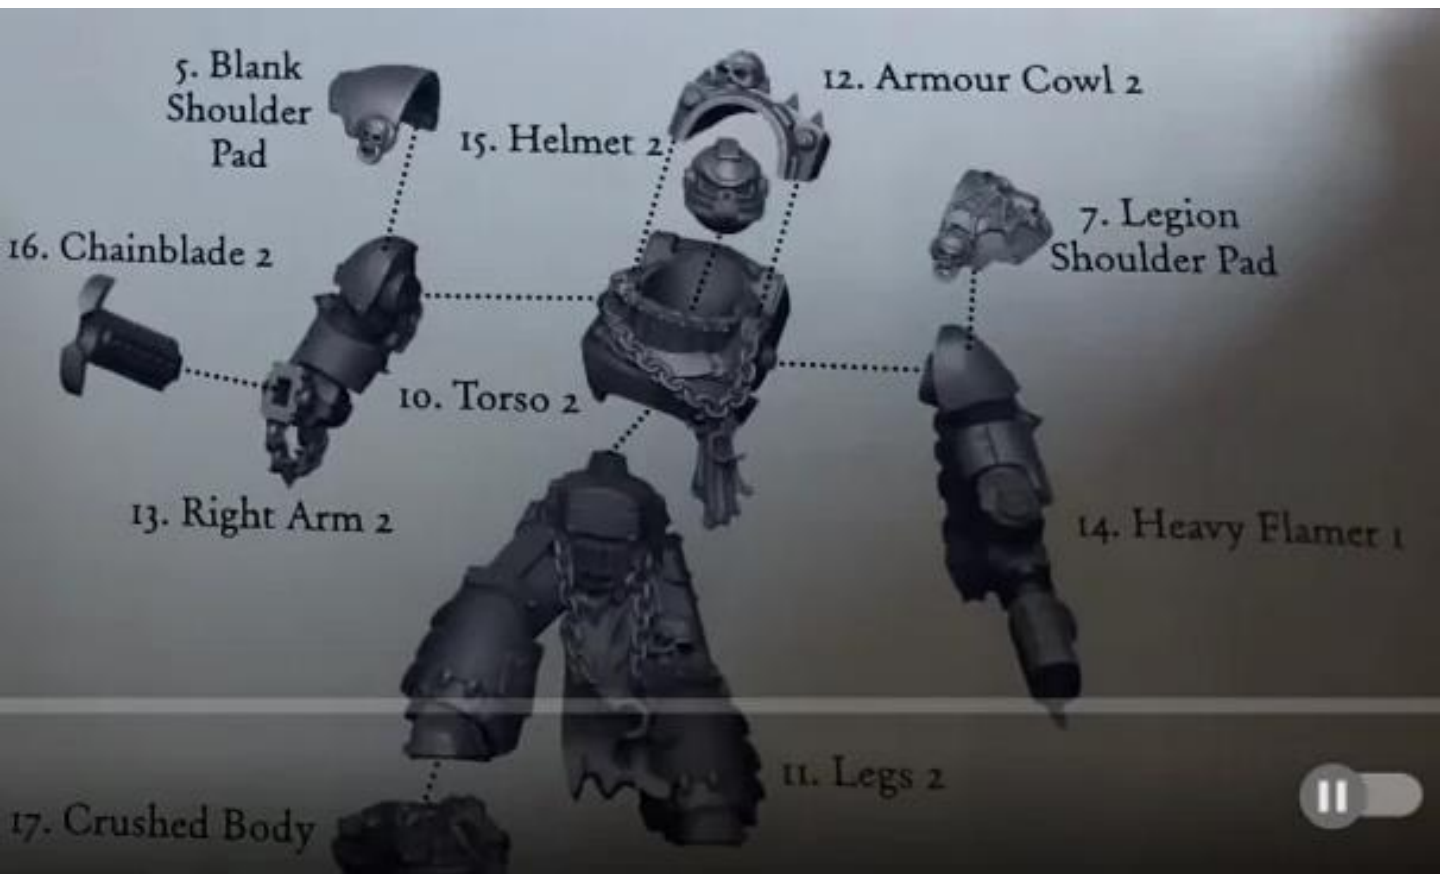

For a more detailed guide to working with resin models, go to the Downloads section of the Forge World website.

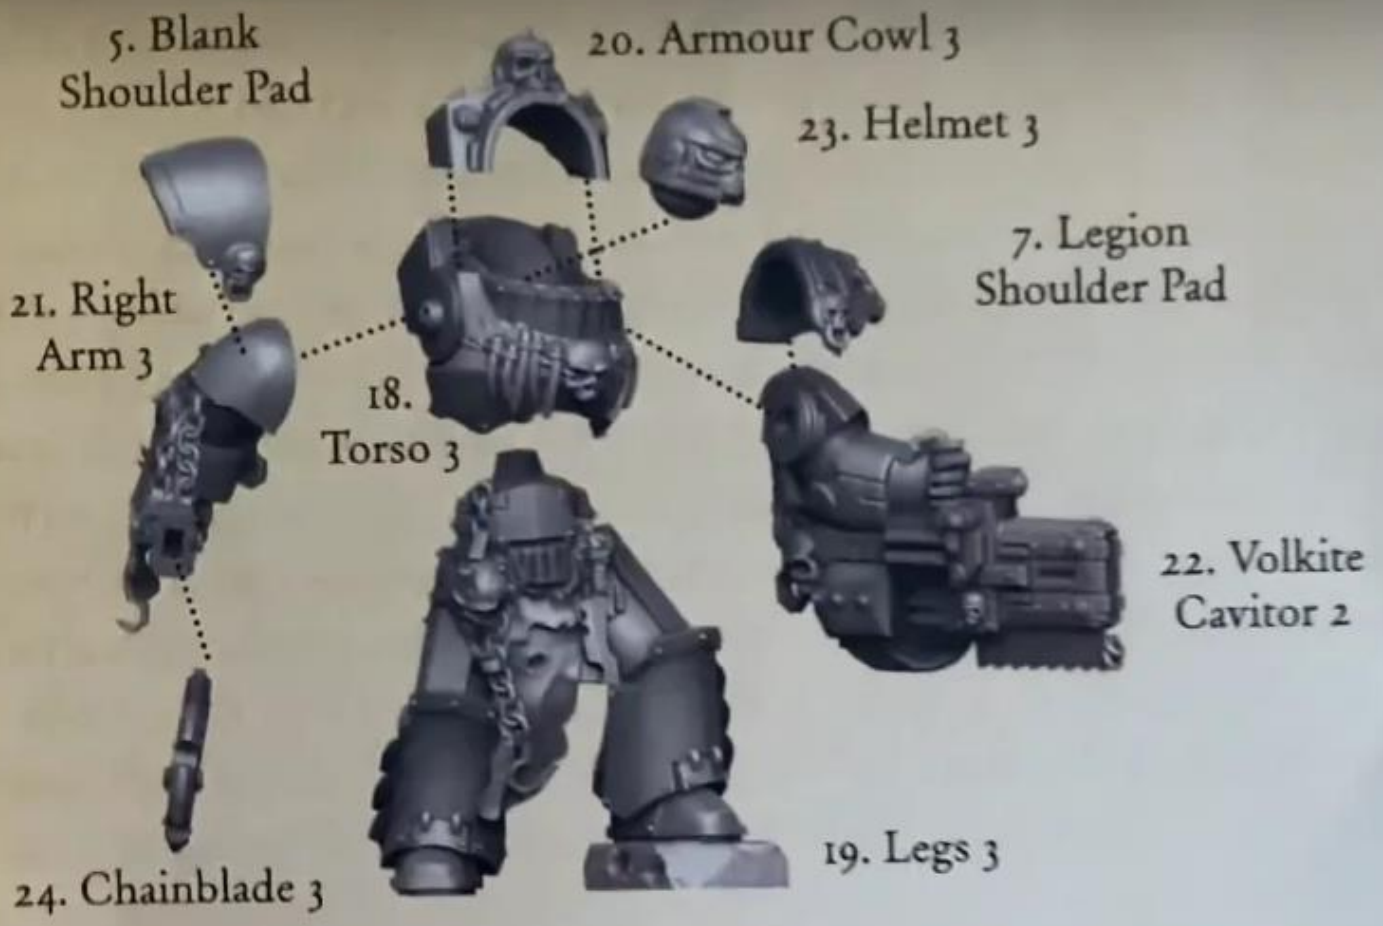

The following shows some example builds. All Helmets, Armour Cowls and Chainblades are interchangeable.

This kit contains all of the pieces required to construct a unit of five Night Lords Contekar Terminator Elite. To glue the resin pieces together, use Citadel Super Glue.

NOTE: We have cast this kit using advanced techniques and the best quality resin, but due to the nature of the casting process, your model may contain small air bubbles. These can be filled with model filler or super glue. Any slight warpage of thin parts can easily be corrected by immersing the part in hot tap water for about 1 minute, then carefully bending it back into shape.
