NOTE: The tags on the underside of the Toe Joints act as stops to assemble a foot in a flat standing position as we are posing our Phantom pushing off it's left foot in this example; the tags are removed to allow a greater degree of movement.

The posing of the foot is crucial to the posing of the legs. Test fitting using sticky tack is advised.

NOTE:
The position of the Torso is determined by
the angle of the waist. It may be adjusted
to assist in the Torso before attaching
the waist to the legs.

NOTE
When gluing the clasp be careful not to get any glue on the hinge. The hinge should pivot freely to allow access to the cockpit interior.

NOTE
Fix one pin into the head, hook it into the hinge and then fix the second pin to the head ensuring a lock in the other side of the hinge.

Tassels

Cockpit Assembly

These are a great way to represent movement on the head. They can be used in to shape by holding with tweezers and gently twisting with a hairdryer. Once twisted bend to the desired shape that matches the direction of motion that the model has been posed in.

NOTE
The Inner Shoulder only glues to the Outer Shoulder along its lower edge, to add strength to this joint it can be worth placing a ball of greenstuff in the shoulder socket of the Upper Torso.
