Thermogenic Combi-fist

This rare combi-weapon combines a long-ranged grenade launcher with a power fist. The thermogenic grenade launcher is capable of hurling a volley of thermogenic bombs a considerable distance. These attach themselves to whatever they hit and then unleash a white-hot blast of energy, which is equally effective against vehicles and living targets.

A model equipped with a thermogenic combi-fist can fire it as a thermogenic grenade launcher instead of shooting another weapon, and attack with it in the Assault phase as a power fist. It can do both in the same turn.
